*Seagate*

6. ...And which one gives you the 'Power to choose, freedom to explore'?

*AMD*

7. What are the 'Halloween Documents'? What did they conclude?

*The **Halloween documents** is the name used outside Microsoft for a series of confidential memoranda on potential strategies related to Open source software, and to Linux in particular. The first Halloween document, written by Microsoft engineer Vinod Valloppillil, was leaked to Eric S. Raymond in October 1998, who immediately published an annotated version on his web site. The document contained references to a second memorandum specifically dealing with Linux, and that document, authored by Vinod Valloppillil and Josh Cohen at Microsoft, was also obtained, annotated and published by Raymond. Microsoft has since admitted the documents' authenticity. Marked 'Microsoft confidential', they identify open source software (OSS), and in particular the Linux operating system as a major threat to Microsoft's dominance of the software industry, and suggest ways in which Microsoft could disrupt the progress of open source software.*

8.\* What is War Driving?

***Wardriving** is an activity consisting of driving around with a laptop or a PDA in one's vehicle, detecting Wi-Fi wireless networks. It is also known as WiLDing (Wireless Lan Driving), originating with the Bay Area Wireless Users Group (BAWUG).*
